BEYOND COMPARE

Hold it in your hand and it becomes immediately apparent what a remarkable, extraordinarily versatile material glass is. It can be shaped into countless forms, rendered smooth and clear, or frosted and opaque. It can appear infinitely fine and light as air, or strong and remarkably fluid.

Thornton is cloaked in a bespoke master-crafted glass exterior - making it the most breathtakingly beautiful, private and exclusive residential offering on the Brisbane river.

BEYOND COMPARE

Hold it in your hand and it becomes immediately apparent what a remarkable, extraordinarily versatile material glass is. It can be shaped into countless forms, rendered smooth and clear, or frosted and opaque. It can appear infinitely fine and light as air, or strong and remarkably fluid.

Thornton is cloaked in a bespoke master-crafted glass exterior – making it the most breathtakingly beautiful, private and exclusive residential offering on the Brisbane river.

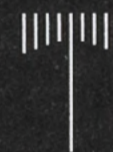

Thornton represents a remarkable opportunity to reside at the very finest and final absolute riverside address at Kangaroo Point.

Pre-eminently positioned on a unique promontory, out in front of every other riverside residence, this unrepeatable position affords Thornton unrivalled river proximity and delivers spectacular 200+ degree unbroken views, incorporating both peaks of the Story Bridge, Eagle Street skyline, Botanic Gardens and South Bank.

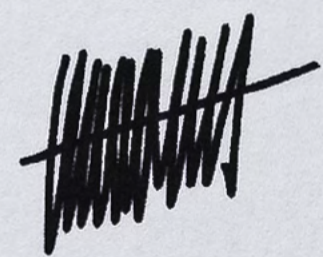

Thornton is a unique creative collaboration between four true masters of their craft. Architect Liam Proberts, internationally renowned for his subtropical residential designs; Chef & Restaurateur Thierry Galichet, whose years of culinary magic have informed the design of Thornton's kitchen space; Gallerist & Patron Philip Bacon, whose insight into displaying and lighting art to its full potential has shaped each residence's gallery space and Ralph Wilson whose infinitely collectible artwork will grace Thornton's lobby.

Visit thorntonkp.com.au to discover the stories behind their unique collaboration through an exclusively commissioned six part short film series.

Designing with glass is incredibly rewarding. It is a versatile, tactile and beautiful material. It can be used to reveal an unbroken aspect or to temper natural light. It can deliver privacy and energy efficiency.

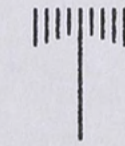

In the design of Thornton, we have worked with glass to wrap living spaces in a translucent skin. The forms float above the landscape providing fluidity in shape, opacity to hint at function, and clarity to frame and highlight the breathtaking views.
